Damien Charlotin

AI Hallucination Cases

This database tracks legal *decisions*[1] in cases where generative AI produced hallucinated content – typically fake citations, but also other types of AI-generated arguments. It does not track the (necessarily wider) universe of all fake citations or use of AI in court filings.

While seeking to be exhaustive (**1959** cases identified so far), it is a work in progress and will expand as new examples emerge. This database has been featured in news media, and indeed in several decisions dealing with hallucinated material.[2]

If you have any questions about the database, a FAQ is available here.
And if you know of a case that should be included, feel free to contact me.[3]

Based on this database, I have developed an automated reference checker that also detects hallucinations: PelAIkan. Check the Reports in the database for examples, and reach out to me for a demo.

For weekly takes on cases like these, and what they mean for legal practice, subscribe to Artificial Authority.
